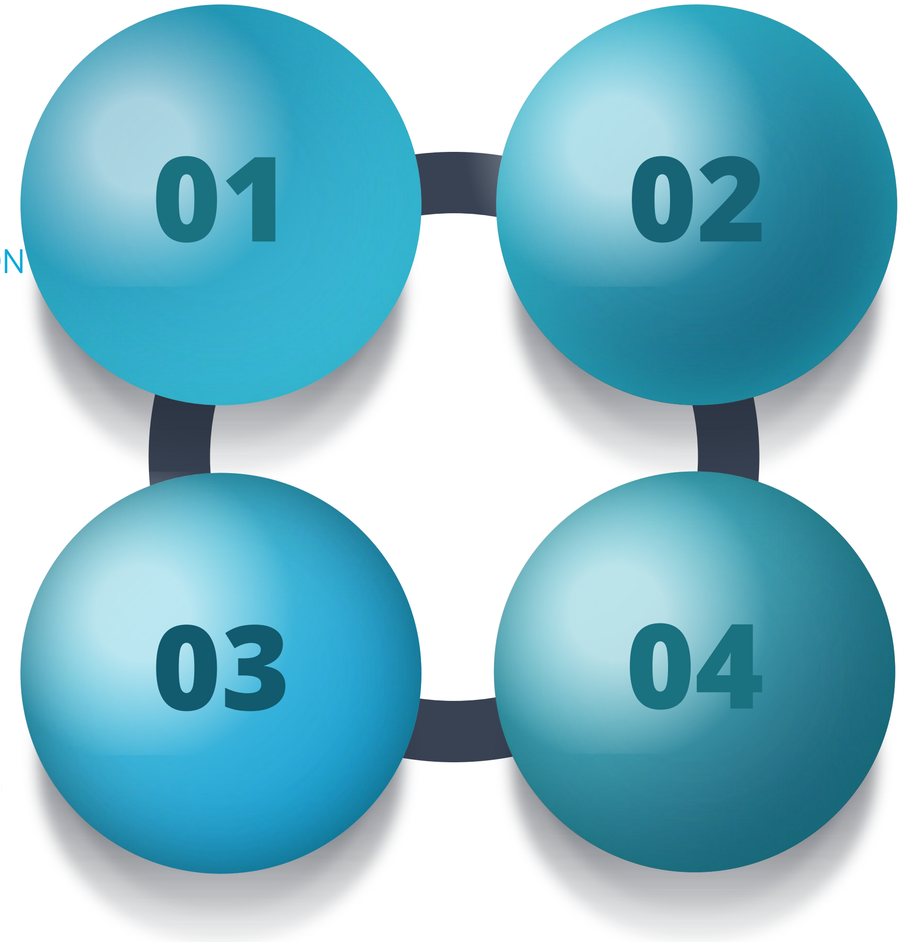
Advantages of

PEERNAP™

Serverless Peer-to-peer CDN NETWORK

Improved Reliability

By distributing video content across multiple sources PEERNAP™ P2P Multi-CDN module reduces reliance on a traditional CDN servers and minimizes the risk of bandwidth bottlenecks .



Enhanced Scalability

PEERNAP™ P2P Mesh CDN will leverage the collective bandwidth and processing power of viewers for massively-scaled, high-quality streaming . This will enable publishers to scale their video delivery to a larger audience without significant infrastructure investments.

Cost Efficiency

With PEERNAP™, publishers can significantly reduce their content delivery costs simply by leveraging end users devices for content distribution, the burden on traditional CDN infrastructure reduced dramatically which can lead to cost saving in traffic usage .

Perfect Video Quality

PEERNAP™ will improve the video quality and mostly the video delivery experience simply by multi sourcing the video from many sources and will reduce rebuffering time .
